

A Personalized Investment Policy Statement for —

Presented by —

Introduction

The purpose of this Investment Policy Statement (IPS) is to establish a clear understanding between The Client and The Advisor, the Advisor as to the investment goals, objectives and management policies applicable to the Investor's investment Portfolio. Hereinafter, The Client will be referred to as "Investor" and hereinafter, The Advisor will be referred to as "Advisor".

This Investment Policy Statement will:

1. Establish reasonable expectations, objectives and guidelines in the investment of the Portfolio's assets
2. Create the framework for a well-diversified asset mix that can be expected to generate acceptable long-term returns at a level of risk suitable to the Investor, including:
 - a. Describing an appropriate risk posture for the investment of the Investor's Portfolio;
 - b. Specifying the target asset allocation policy;
 - c. Establishing investment guidelines regarding the selection of investment managers, permissible securities and diversification of assets;
 - d. Specifying the criteria for evaluating the performance of the Portfolio's assets
3. Define the responsibilities of the Investor and the Advisor
4. Encourage effective communication between the investment manager(s) and the Investor

The principal reason for developing a long-term investment policy and for putting it in writing is to enable you and us to protect your Portfolio from *ad hoc* revisions of sound long-term policy. The written investment policy will help you maintain a long-term perspective when short-term market movements may be distressing and your investment strategy might otherwise be questioned.

This IPS is not a contract. Legal counsel has not reviewed this investment policy statement. The Advisor and the Investor use it at their own discretion. This IPS is intended to be a summary of an investment philosophy and the procedures that provide guidance for the Investor and the Advisor. The investment policies described in this IPS should be dynamic. These policies should reflect the Investor's current status and philosophy regarding the investment of the Portfolio. These policies will be reviewed and revised periodically to ensure they adequately reflect any changes related to the Portfolio, to the Investor or to the capital markets.

It is understood that there can be no guarantee about the attainment of the goals or investment objectives outlined herein.

Investment Objectives

The specific objectives for these assets shall be to achieve an average annual rate of return (over a period of at least 10 years) of the Consumer Price Index plus 6% for the aggregate investments under this Investment Policy Statement. The equity range of the portfolio will be thirty to seventy percent.

Benchmark

The benchmark for this portfolio will be:

- 50% Vanguard Total Stock Market Index Fund (VTSMX)
- 35% Vanguard Total Bond Market Index Fund (VBMFX)
- 10% Vanguard Total International Stock Index Fund (VGTSX)
- 5% Vanguard Prime Money Market Fund (VMMXX)

Time Horizon

For the purposes of planning, the time horizon for these investments is to be in excess of ten years. Capital values do fluctuate over shorter periods, and the Investor should recognize that the possibility of capital loss does exist. However, historical asset class return data suggest that the risk of principal loss over short-term holding periods can be minimized with the long-term investment mix employed under this Investment Policy Statement.

Risk Tolerance

Investment theory and historical capital market return data suggest that, over long periods of time, there is a relationship between the level of risk assumed and the level of return that can be expected in an investment program. In general, higher risk (e.g., volatility of return) is associated with higher return.

Given this relationship between risk and return, a fundamental step in determining the investment policy for the Portfolio is the determination of an appropriate risk tolerance. There are two primary factors that affect the Investor's risk tolerance:

1. Financial ability to accept risk within the investment program, and;
2. Willingness to accept return volatility

Taking these two factors into account, the Investor rates his or her own risk tolerance as Balanced. The Investor recognizes that higher returns involve some volatility and has indicated a willingness to tolerate declines in the value of this Portfolio of between 0% and 15% in a given year.

Liquidity

Investor has expressed a need to maintain a minimum level of cash or cash equivalents in Investor's Portfolio at all times. Therefore, at least 2% of the Portfolio shall be maintained at all times.
